Volume/92

January/December 1961

Published by Public Works Publications

200 South Broad Street, Ridgewood, New Jersey

*This Volume of  
PUBLIC WORKS is  
available on  
microfilm through  
University Microfilms,  
313 North First Street,  
Ann Arbor, Michigan.*

**ANNUAL  
INDEX**

# PUBLIC WORKS INDEX

## January-December 1961 • Volume 92

	Month and page		Month and page		Month and page
<b>HIGHWAYS AND STREETS</b>					
<b>Bituminous Pavements</b>					
Lime Used to Improve Hot Mix	Feb.—93	Modern Techniques and Equipment Save Money	Oct.—160	Roadside Sign Radio Control	Jun.—110
Heater-Planers Get Bigger	Apr.—136	Versatile Equipment Proves To Be a Good Investment	Nov.—95	Tractor Seat Wired for Safety	Jul.—92
Saving on Street Repairs	May—90	Anything New in Snow Control?	Nov.—101	The Case for Galvanized Steel Guard Rails	Sep.—224
Basic Principles of Pavement Design:		Cutting Operating Costs Through a Systematic Maintenance Plan	Nov.—131	Safety Rest Areas on Wisconsin's Interstate System	Oct.—139
Part III—Flexible Pavements	May—114	Automatic Paver Control System	Nov.—150	New Concepts in School Zone Signs	Oct.—198
		Diesel Engine Starting in Cold Weather	Dec.—126	Aggressive Safety Program Earns a Record for the Pennsylvania Turnpike	Nov.—117
				Report on Experience with Median Barriers	Dec.—85
<b>Bridges, Culverts and Tunnels</b>					
Tunnel Gets Automatic Signal System	May—138	<b>Finance, Legal and Planning</b>			
Tunnel Solves Traffic Conflict Between River and Road	Jun.—130	What Is the Future of Metropolitan Transportation?	Jan.—69	<b>Snow and Ice Control</b>	
Bridge Railings Positioned with Epoxy	Jun.—166	Fitting the Highway Into the Urban Plan	Jan.—98	Snow Removal Contracts and Heated Pavements Aid Boston's Winter Program	Jan.—103
Aluminum Bridges for Highways	Sep.—146	Community Renewal Planning in New Jersey	Mar.—172	Planned Maintenance Knows No Off Season	Apr.—118
New Inlet Design for Culverts Saves Highway Dollars for Iowa	Nov.—112	The Standard Highway Pattern for Cities	Apr.—177	Urban Snow Removal Conference	May—152
		Photographic Records Aid Highway Condition Studies	Jun.—116	How Cincinnati Controls Snow and Ice	Aug.—89
		Baltimore Beltway Is Years Ahead of Old Schedule	Jul.—107	A Border State's Winter Battle	Aug.—92
		Planning for Annual Highway Maintenance	Jul.—111	Mild Winters Still Require Planning	Aug.—94
		Organization of a Traffic Engineering Department	Jul.—113	Technical Panel Discussions	Aug.—96
		Selling Your Traffic Program	Aug.—138	Colorado Keeps the High Roads Open	Aug.—98
		How Detroit Solves Urban Transportation Problems	Sep.—99	Sidewalk Snow Removal Requirements and Procedures	Sep.—128
		Electronic Plotting Machine Draws Highway Cross Sections	Sep.—178	Salt and Equipment Stored Under One Roof	Sep.—132
		Timely Maintenance—A Vital Highway Need	Oct.—106	Maryland's Snow Control Program	Sep.—137
		Special Assessment by Formula	Oct.—118	On-The-Job Action	Sep.—137
		Safety Rest Areas on Wisconsin's Interstate System	Oct.—139	Keeps Borough Streets Open	Oct.—138
		Modern Techniques and Equipment Save Money	Oct.—160	Thruway Prepares for Winter Storms	Oct.—174
		Can We Estimate the Cost of Winter Maintenance?	Nov.—106	Anything New in Snow Control?	Nov.—101
		Applications of Computers in Public Works Engineering	Nov.—161	Can We Estimate the Cost of Winter Maintenance?	Nov.—106
				Pavement Heating Experiment	Dec.—88
				Snow and Ice Control—A Full-Time Engineering Job	Dec.—102
<b>Concrete Pavements</b>					
Basic Principles of Pavement Design:		<b>Materials</b>			
Part II—Rigid Pavements	Apr.—92	Lime Used to Improve Hot Mix	Feb.—93	<b>Stabilized Surfaces and Bases</b>	
Bold Program Rebuilds Downtown Street	Dec.—73	Operating Characteristic Curves of Standard Portland Cement Tests	Mar.—94	Use of Soil Cement Cuts Street Costs	Feb.—82
		Standardization in Engineering Test Procedures	Mar.—118	Maintenance of State Highway Shoulders	Apr.—88
		Ductile Iron for Highway Construction	Apr.—122	Stabilization Saves Township Roads	Jun.—109
		Bridge Railings Positioned With Epoxy	Jun.—166	The Soil Density Test	Jul.—158
		Soils Laboratory Assures Quality Control of County Road Building Materials	Jul.—125	Stretch the Road Dollar in Township Work	Aug.—112
		Uses of Epoxy Resins	Sep.—116	Construction of a Lime Stabilized Base	Sep.—114
		Salt and Equipment Stored Under One Roof	Sep.—132	Rock Salt Stabilization	Sep.—114
				Winter-Proofs Roads	Oct.—134
				Secondary Road Improvement by State Construction	Nov.—123
				No Delay on This Detour	Dec.—91
				Production Record for Base Stabilization	Dec.—118
<b>Construction Methods</b>					
Use of Soil Cement Cuts Street Costs	Feb.—82	<b>Parking</b>			
Expressway Design Fits Valley Restrictions	Feb.—105	Fast, Efficient Meter Enforcement	Mar.—120	<b>Street Cleaning</b>	
The Soil Density Test	Jul.—158	Ultrasonic Cleaners Cut Our Parking Meter Maintenance Overtime	May—135	Vacuum Loader Speeds Street Cleaning	May—125
Epoxy Resin Paver	Jul.—180			Man-Made Bristles for Sweeping	Jul.—158
Ditch Construction Method Has Speed and Economy	Aug.—140			Chicago Uses Fluorescent Color for Litter Baskets and Vehicles	Aug.—142
Secondary Road Improvement by Stage Construction	Nov.—123			Municipal Sanitation in Tokyo	Sep.—120
Bold Program Rebuilds Downtown Street	Dec.—73			Planning a Successful Leaf Removal Program	Oct.—127
				Street Sweeping Is a Big Job for Cities	Nov.—126
				Modern Street Cleaning	Dec.—125
<b>Design</b>					
What Is the Future of Metropolitan Transportation?	Jan.—69	<b>Roadside Improvement</b>			
Basic Principles of Pavement Design:		How Much Do You Spend for Mowing?	Mar.—121	<b>Street and Area Lighting</b>	
Part I—Pavement Behavior	Mar.—97	Maintenance of State Highway Shoulders	Apr.—88	New Shopper's Mall is Brightly Lighted	Mar.—111
Basic Principles of Pavement Design:		Planned Maintenance Knows No Off Season	Apr.—118	Hollywood Boulevard Gets Special Luminaires	Mar.—134
Part II—Rigid Pavements	Apr.—92	County Highway Mowing Program	Jun.—180	Custom-Engineered Luminaires for Municipal Garages	May—165
The Standard Highway Pattern for Cities	Apr.—177	Landscape Development Policies for the Interstate Highway System	Jul.—99	Memphis Provides High Standards of Street Lighting Service	Jun.—124
Principles and Fundamentals of Intersection Channelization	May—105	Roadside Development on Ohio Interstate Routes	Jul.—120	How Good Street Lights Benefit a City	Jul.—110
Basic Principles of Pavement Design:		Seeded Grass Blankets Prevent Highway Erosion	Jul.—144	A Lighting Maintenance Problem	Aug.—111
Part III—Flexible Pavements	May—114	Aerial Application of Fertilizer	Aug.—100	Modern Lighting for Dearborn's Civic Center	Sep.—111
Landscape Development Policies for the Interstate Highway System	Jul.—99	Ohio's Short Course on Roadside Development	Sep.—105	"Operation Cleanup" Yields 4700 Tons of Water	Nov.—99
Applications of Computers in Public Works Engineering	Nov.—161	Chemical Approach to the Roadside Grass Maintenance Problem	Oct.—124	Street Lighting Progress Recorded in Lake Worth	Nov.—122
		Safety Rest Areas on Wisconsin's Interstate System	Oct.—139		
		Maintenance of Freeways in Detroit	Dec.—96		
		How to Roll Out a Carpet of Grass	Dec.—151		
<b>Drainage</b>					
Surface Drainage Problems Caused by Urban Development	Jan.—118	<b>Safety</b>			
Storm Water Detention in Urban Areas	Jan.—146	Experience with Pulsating Red Traffic Signals	Mar.—146	<b>Surface Maintenance</b>	
"Accepted Practice" in Municipal Storm Drain Design	Feb.—87	Repair Zone Signaling and Protection	Mar.—162	Successful Repair of Street Openings	Feb.—98
Unusual Storms Tax Drainage Facilities	Jul.—89	Skidding Factors on Wet Pavement	Apr.—90	Basic Principles of Pavement Design:	
Driftwood: A Drainage Maintenance Problem	Aug.—105	Traffic Sign and Marking Maintenance for a Small City	Apr.—140	Part I—Pavement Behavior	Mar.—97
Ditch Construction Method Has Speed and Economy	Aug.—140	Nuclear Energized Self-Luminous Signs for Highways	Apr.—142	Maintenance of State Highway Shoulders	Apr.—88
Storm Drainage Problems and Solutions	Aug.—172			Planned Maintenance Knows No Off Season	Apr.—118
Influence of Combined Sewers on Pollution Control	Oct.—129			Heater-Planers Get Bigger	Apr.—136
				Saving on Street Repairs	May—90
				Basic Principles of Pavement Design:	
				Part III—Flexible Pavements	May—114
<b>Equipment</b>					
Schoolhouse on Wheels for Equipment Operators	Jan.—86				
Developments in Highway Maintenance Equipment	Jan.—95				
Township Upgrades Equipment Spread	Jan.—138				
400,000 Miles on Diesel Truck Tractor	Mar.—150				
Number of Automobiles Used By County Highway Departments	Mar.—174				
Equipment Operator Training Boosts Production	Mar.—176				
Municipal Experience with Compact Cars	Apr.—109				
Front End Loader Speeds County Highway Operations	Jun.—137				
Tractor Seat Wired for Safety	Jul.—92				
Epoxy Resin Paver	Jul.—180				
Survey Shows State-Owned Highway Equipment	Oct.—113				

	Month and page
Stabilization Saves Township Roads	Jun.—109
Photographic Records Aid Highway Condition Studies	Jun.—116
Planning for Annual Highway Maintenance	Jul.—111
Epoxy Resin Paver	Jul.—180
Timely Maintenance— A Vital Highway Need	Oct.—106
Bold Program Rebuilds Downtown Street	Dec.—73
No Delay on This Detour	Dec.—91
Maintenance of Freeways in Detroit	Dec.—96

## Surveying Methods

Aerial Study of Tunnel Approach Traffic Problems	Jul.—97
Unique Survey Control System Improves Urban Mapping	Jul.—115
Soils Know-How for Cities	Aug.—107
Economical Survey Method for Sewer Design	Sep.—124
Electronic Plotting Machine Draws Highway Cross Sections	Sep.—178

## Traffic Control and Signs

Traffic Committee Solves Intersection Problems	Jan.—76
Electronic Control of Traffic Signals	Feb.—81
Plastic Markings for Railroad Crossings	Mar.—132
Experience with Pulsating Red Traffic Signals	Mar.—146
Repair Zone Signaling and Protection	Mar.—162
Expanded Pavement Marking Program	Mar.—172
Traffic Sign and Marking Maintenance for a Small City	Apr.—140
Nuclear Energized Self-Luminous Signs for Highways	Apr.—142
Principles and Fundamentals of Intersection Channelization	May—105
Tunnel Gets Automatic Signal System	May—138
Roadside Sign Radio Control	Jun.—110
Aerial Study of Tunnel Approach Traffic Problems	Jul.—97
Organization of a Traffic Engineering Department	Jul.—113
Selling Your Traffic Program	Aug.—138
Minneapolis Installs New Traffic Control System	Sep.—150
Traffic Controller Avoids the "Wasted" Green Light	Oct.—136
New Concepts in School Zone Signs	Oct.—198
Aggressive Safety Program Earns a Record for the Pennsylvania Turnpike	Nov.—117
Report on Experience with Median Barriers	Dec.—85

## Weed and Brush Control

How Much Do You Spend for Mowing?	Mar.—121
County Highway Mowing Program	Jun.—180
Fighting Lake Weeds with Chemical Spray	Aug.—114
Chemical Approach to the Roadside Grass Maintenance Problem	Oct.—124

## Highway and Airport Digests

Jan.—112; Feb.—140; Mar.—134; Apr.—130; May—146; Jun.—158; Jul.—136; Aug.—128; Sep.—154; Oct.—168; Nov.—152; Dec.—118
---

## REFUSE COLLECTION AND DISPOSAL

### Collection Methods

New Compactor Replaces Two Open Trucks and Halves Collection Costs	Jan.—85
Bulk Refuse Collection Helps Keep New York Clean	Feb.—90
The Migration of Fly Larvae From Refuse Containers vs. Frequency of Collection	Apr.—120
Revised Collection Routes Meet Suburban Growth	May—108
Plastic Barrels Save Money on Refuse Collection	May—186
How Refuse Collection Efficiency Influences Costs	Jun.—135
New Refuse Collection Fleet Saves Money for Jackson	Jun.—202
Municipal Sanitation in Tokyo	Sep.—120

### Incineration

Refuse Burner Supplements Town Landfill	Mar.—117
Backhoe Solves Incinerator Problem	Mar.—123
Refuse Disposal for a County Incinerator and Sewage Treatment Plant	Mar.—142
Work Together	Jul.—109
Modification of Incinerator Precipitator Baffle Saves \$15,000 per Unit	Jul.—174
Municipal Sanitation in Tokyo	Sep.—120

Continued Improvement for the Hempstead Incinerator	Sep.—133
Don't Abandon That Old Incinerator—Yet	Oct.—109

### Sanitary Fill

Sanitary Landfill Operations	Jun.—152
County Runs Economical Landfills	Aug.—109
Keeping a Sanitary Landfill Sanitary	Sep.—112
Municipal Sanitation in Tokyo	Sep.—120
Burning Helps Conserve Landfill Area	Sep.—215
Landfill Site Gives Double Benefit	Nov.—172D

### Other Disposal Methods

A Look at European Composting	Feb.—107
Six Years of Refuse Composting in Britain	Dec.—110
The Disposal of Dead Marine Mammals	Dec.—151

### Costs

Cost of Mixed Refuse Collection and Disposal	Mar.—86
How Refuse Collection Efficiency Influences Costs	Jun.—135

### Refuse Digests

Jan.—122; Feb.—122; Mar.—164; Apr.—156; May—166; Jun.—146; Jul.—160; Aug.—142; Sep.—182; Oct.—150; Nov.—164; Dec.—132
---

## SEWERAGE AND SEWAGE TREATMENT

### Finance, Legal and Planning

Let's Do the Obvious— Let's Get Going	Jan.—54
Robot Monitor Keeps Watch on River Conditions	Jan.—73
Robot Monitors on the Delaware	Jan.—129
Rationale of Pollution Control Under Scrutiny	Feb.—62
Package Plants Provide Sewerage for a Growing Community	Feb.—111
Pleasure-Boating Interests Are Taking the Lead In Curbing Sewage Pollution	Mar.—82
Administrative Policies for Utility Extensions	Mar.—125
Governmental Regulations and the Cost of Sewage Treatment	Mar.—126
What You Should Know About Managing Sewage Treatment Works	Apr.—104
Sanitary Aspects of Watershed Management	Jun.—126
With Good Sales Work, Public Law 660 Has Really Helped New Mexico	Jun.—132
Stream-Flow Forecasts — A New "Tool" for River-Quality Management	Jul.—72
"Nuts and Bolts" Aspects of Pollution Control	Aug.—70
A New Approach to Sewage Treatment Plant Expansion	Aug.—85
Reducing Water Pollution by Ships and Boats	Aug.—149
Accounting for Sewerage Systems and Treatment Plants	Aug.—150
County Master Plan for Water Supply and Sewerage	Oct.—101
Water Pollution Control Based on Facts	Oct.—121
Specifying and Purchasing Sewage Works Equipment	Nov.—172
Significance of Detergents in Water Pollution Control	Dec.—93

### Sewer Systems—Construction

Water and Sewers for Freedomland	Feb.—94
How Long Will It Take to Complete the Sewer?	Apr.—110
108-Inch Corrugated Metal Pipe for Bypass	Apr.—156
Force Account Construction and Direct Pur- chases by Water and Sewage Utilities	Jul.—118
Compression Joints Aid Sewer Contractor	Jul.—127
Influence of Combined Sewers on Pollution Control	Oct.—129
From Six Outfalls to One Treatment Plant	Dec.—75
33-Year-Old Force Main Shows Increased Strength	Dec.—105

### Sewer Systems—Design

Sewer System Has 17 Lift Stations	Jan.—81
Sewerage Developments in San Francisco	Jan.—141

Small Size Pipe for Sanitary Sewers	Apr.—123
Air Force Academy Sewage Treatment Plant Designed for Effluent Re-Use	Jun.—120
Economical Survey Method for Sewer Design	Sep.—124
County Master Plan for Water Supply and Sewerage	Oct.—101
From Six Outfalls to One Treatment Plant	Dec.—75

### Sewer Systems—Maintenance

Sewer Inspection From An Easy Chair	Jan.—78
Sealing Sewers by External Grouting of Joints	May—131
Sewer Maintenance Crew Specializes in Safety	May—136
Color Photos Check Sewer Coatings	May—184
Preventive Sewer Maintenance	Sep.—107
How to Inspect Sewers by TV	Sep.—192
Lining an Old Sewer with Plastic Pipe	Oct.—141
Monitoring Sewer Defects by Television	Oct.—162
TV Camera Inspects 1000 Feet of Sewer a Day	Nov.—120
Locating Leaky Sewers With Smoke	Nov.—133

### Sewer Systems—Storm Drainage

Storm Water Detention in Urban Areas	Jan.—146
"Accepted Practice" in Municipal Storm Drain Design	Feb.—87
Storm Drainage Problems and Solutions	Aug.—172
Drainage Reservoirs Solve Flood Problem	Sep.—119
Influence of Combined Sewers on Pollution Control	Oct.—129

### Sewage Pumping

Sewer System Has 17 Lift Stations	Jan.—81
Package Plants Provide Sewerage for a Growing Community	Feb.—111
Lift Stations, Sewage and Odors	Jun.—182
Solving Sewage Sludge Pumping Problems	Jul.—222
Variable Speed Pumps for Sewerage Lift Stations	Aug.—64
Electrification of a Sewage Pumping Station	Sep.—129
Temporary Sewage Pumping Stations	Nov.—104
Largest Factory-Built Sewage Pumping Station	Dec.—146

### Sewage Treatment—Design

Sewer System Has 17 Lift Stations	Jan.—81
First Zimmermann Process Plant Nearing Completion	Jan.—105
Turnpike Sewage Treatment Data Will Aid Designers	Feb.—84
Sewage Treatment Plant Designed for Industrial Expansion	Jun.—105
A New Approach to Sewage Treatment Plant Expansion	Aug.—85
Sewage Treatment for Greater Vancouver	Aug.—177
From Six Outfalls to One Treatment Plant	Dec.—75

### Sewage Treatment— Industrial Wastes

Sewerage and Refuse Experience with the Dallas Industrial Waste Ordinance	Mar.—164
Sewage Treatment Plant Designed for Industrial Expansion	Jun.—105
Irrigation Disposal of Industrial Wastes	Jul.—96
What's In a Name? Let's Examine the Term "Industrial Wastes"	Sep.—80
Treating Combined Sewage and Poultry Wastes	Dec.—98

### Industrial Waste Digests

Jan.—142; Feb.—150; Mar.—178; Apr.—166; May—176; Jun.—184; Jul.—170; Aug.—166; Sep.—196; Oct.—202; Nov.—184; Dec.—148
---

### Sewage Treatment—Construction

Sewer System Has 17 Lift Stations	Jan.—81
How Long Will It Take to Complete the Sewer?	Apr.—110
Force Account Construction and Direct Pur- chases by Water and Sewage Utilities	Jul.—118
Plastic Trickling Filter Media	Oct.—128

### Sewage Treatment—Operation

Aeration Tank Hazards Reduced by Safety Cable	Apr.—91
Treatment Plant Has Long, Useful Life	Jun.—138
Solving Sewage Sludge Pumping Problems	Jul.—222

	Month and page
<b>Treatment Methods and Research</b>	
Robot Monitor Keeps Watch on River Conditions	Jan.—73
Gas Scrubbing for H <sub>2</sub> S Removal and Methane Enrichment	Mar.—112
Package Plants for Sewage Treatment	Apr.—111
Pollution Control Practice in Eastern Europe—Part 1	May—86
The Removal of ABS from Sewage	May—101
Pollution Control Practice in Eastern Europe—Part 2	Jun.—60
Air Force Academy Sewage Treatment Plant Designed for Effluent Re-Use	Jun.—120
Studies on Oxygen Demand of Sterile Sewage	Jul.—103
A New Approach to Sewage Treatment Plant Expansion	Aug.—85
Irrigation as a Sewage Re-Use Application	Aug.—116
Are Domestic Sewage Lagoons Safe?	Oct.—126
Significance of Detergents in Water Pollution Control	Dec.—93
Treating Combined Sewage and Poultry Wastes	Dec.—98

## Costs

Costs of Sewer Construction	Apr.—76
Costs of Laying Water Mains and Sewers	Aug.—76

## Sewerage Digests

Jan.—122; Feb.—122; Mar.—164; Apr.—156; May—166; Jun.—146; Jul.—160; Aug.—142; Sep.—182; Oct.—150; Nov.—164; Dec.—132	
---	--

## WATER SUPPLY AND PURIFICATION

### Finance, Legal and Planning

Rejuvenation of a Major Water System	Feb.—77
Delaware Basin Proposal Provides New Pattern for Water Development	Apr.—72
\$35 Million Worth of Water System Deadlines—and More to Come	Apr.—85
The World's Largest Water Filtration Plant	Jun.—101
Trends in Water Consumption	Aug.—83
Development of a New Water District	Sep.—135
County Master Plan for Water Supply and Sewerage	Oct.—101
Niagara County Solves Its Water Problem	Nov.—114
Expansion Triples Water Plant Capacity	Dec.—106

### Water Pumping

Unique Controls for Variable Speed Pumps	Jan.—147
Natural Filtration	Mar.—91
Pumping Water by Air-Lift	May—133
Gas Engines Power Pumping Plant	May—156
Pumping Water at Variable Speed —With Efficiency	Jul.—93

### Reservoirs and Tanks

Rural Water System Tower	Jan.—132
10-MG Tank Features Construction Economies	Mar.—116
Runoff Storage Reservoir Will Relieve Dry Summers	May—128
New Dam and Reservoir for EBMUD	May—190
Open-Top Reservoirs Provide for Future Domes	Aug.—108
County Tackles 21,000-Acre Reservoir Clearing Job	Oct.—116
Coatings for Protecting Water Tanks	Dec.—100

### Supply Lines and Distribution

Water and Sewers for Freedomland	Feb.—94
2300-Foot Underwater Crossing	Apr.—116
The World's Largest Water Filtration Plant	Jun.—101
Force Account Construction and Direct Purchases by Water and Sewage Utilities	Jul.—118
Federal Specification for Cement Mortar Lined and Reinforced Mortar Coated Steel Pipe	Aug.—163
Controlling Water Pressure Over 1000-Ft. Elevation Range	Sep.—127
County Master Plan for Water Supply and Sewerage	Oct.—101
Niagara County Solves Its Water Problem	Nov.—114

## Treatment Plants— Design and Operation

Treatment Plant Provides Iron Removal and Softening	Jan.—88
Rejuvenation of a Major Water System	Feb.—77
Removing Sand and Gravel from a Water Filter	Apr.—78
\$35 Million Worth of Water System Deadlines—and More to Come	Apr.—85
Toledo Water Supply Data	Apr.—124
County Water System Features Advanced Automation	Jun.—111
Microtrainers to Remove Insect Larvae	Jun.—118
Automatic Valveless Filters Treat Water for Hyde Park	Jul.—105
Development of a New Water District	Sep.—135
Compact Plant Filters and Softens Water	Nov.—174
Small Filter Plant Treats Hudson River Water	Dec.—89
Expansion Triples Water Plant Capacity	Dec.—106
Handling Chemicals for Water Treatment	Dec.—140

## Instrumentation and Process Control

Treatment Plant Provides Iron Removal and Softening	Jan.—88
Robot Monitors on the Delaware	Jan.—129
Unique Controls for Variable Speed Pumps	Jan.—147
Rejuvenation of a Major Water System	Feb.—77
County Water System Features Advanced Automation	Jun.—111
Water Demand Meters Show Results	Dec.—81

## Treatment Methods and Research

Treatment Plant Provides Iron Removal and Softening	Jan.—88
1 MGD Sea Water Conversion Plant	Mar.—124
Turbidity Removal with Coarse Grained Filters	Apr.—107
Water Supply Tastes and Odors Controlled by Potassium Permanganate	May—129
Microtrainers to Remove Insect Larvae	Jun.—118
Water Supply from a Saline Conversion Plant	Sep.—110
Home Fluoridation Unit	Oct.—200
The Conversion of Sea Water	Nov.—129

## Water Demand

Turnpike Sewage Treatment Data Will Aid Designers	Feb.—84
Population per Water Service	Mar.—86
Trends in Water Consumption	Aug.—83
Water Demands of Decentralized Community Facilities	Sep.—102
Some New Facts for Forecasting Industrial Water Needs	Nov.—78
Analysis of Water Demand from Meter Records	Nov.—97
Water Demand Meters Show Results	Dec.—81

## Water Supply and Sources

Natural Filtration	Mar.—91
Delaware Basin Proposal Provides New Pattern for Water Development	Apr.—72
\$35 Million Worth of Water System Deadlines—and More to Come	Apr.—85
Monitoring the Lower Mississippi	May—126
New Dam and Reservoir for EBMUD	May—190
Sanitary Aspects of Watershed Management	Jun.—126

## Water System and Plant Maintenance

Portable Generators Add Versatility to Truck Fleet	Aug.—101
Ultrasonic Cleaning System for Water Meters	Oct.—184

## Costs

Costs of Laying Water Pipe	Jan.—58
Costs of Laying Water Mains and Sewers	Aug.—76
Changes in Construction Costs	Sep.—84

## Water Works Digests

Jan.—132; Feb.—130; Mar.—152; Apr.—144; May—156; Jun.—170; Jul.—148; Aug.—154; Sep.—168; Oct.—184; Nov.—174; Dec.—140	
---	--

## ADMINISTRATION AND PLANNING

What Is the Future of Metropolitan Transportation?	Jan.—69
Schoolhouse on Wheels for Equipment Operators	Jan.—86
Fitting the Highway Into the Urban Plan	Jan.—98
Population and Land Areas of Resort Hotels	Jan.—128
How Routine Work of Utility Men Can Make the News	Feb.—103
Standardization in Engineering Test Procedures	Mar.—118
Administrative Policies for Utility Extensions	Mar.—125
Community Renewal Planning in New Jersey	Mar.—172
Steps in Preparing a 5-Year Capital Improvement Program	May—111
Do Consulting Engineering Services Cost—Or Pay?	May—174
Realistic Fee Schedules for Consultants	Jun.—190
How Urban Renewal and Public Works Can Be Partners	Aug.—102
Special Assessment by Formula	Oct.—118
Airport Vicinity Land Use Studies —An Urgent Need	Nov.—116
Marked Growth in Public Works Planning	Nov.—142
Improving Your Annual Report	Dec.—60

## CIVIL DEFENSE AND EMERGENCIES

Texas Prepares to Evaluate Radioactive Water Pollution	Feb.—96
Radio Aids in Tornado Cleanup	Aug.—104

## MUNICIPAL POWER PLANTS

Electric System Construction Budgets	Jan.—148
Induction Motor Types and Characteristics	Feb.—156
Caddis Flies, Fish and Power Plant Condensers	Mar.—115
Sources of Additional Power Supply	Mar.—188
Selection of Power Plant Sites	Apr.—174
Preparation of Electric System Operating Budgets	May—74
Distribution System Service Reliability	Jun.—92
Insulation Co-ordination	Jul.—178
Specifying Protective Relaying	Sep.—220
Mechanical Design of Transmission Lines	Oct.—74
Electric House Heating	Nov.—84
Electric Rate Making	Dec.—128

## INSECT AND RODENT CONTROL

Caddis Flies, Fish and Power Plant Condensers	Mar.—115
The Migration of Fly Larvae from Refuse Containers vs. Frequency of Collection	Apr.—120
Pesticides, Chemicals and Water Pollution	Jun.—206

## PUBLIC HEALTH

Texas Prepares to Evaluate Radioactive Water Pollution	Feb.—96
New Smog Warning Service	Apr.—152
Monitoring the Lower Mississippi	May—126
Typhoid Tracer to Bathing at a Polluted Beach	May—182
Pesticides, Chemicals and Water Pollution	Jun.—206
Are Domestic Sewage Lagoons Safe?	Oct.—126
Influence of Combined Sewers on Pollution Control	Oct.—129
Guidelines for Municipal Control of Family Pools	Oct.—176
Waterborne Disease Outbreaks in 1960	Dec.—64

## RECREATIONAL FACILITIES

Lake Bed Cleared by Stump Cutter	Jun.—122
Sanitary Aspects of Watershed Management	Jun.—126

	Month and page
Fighting Lake Weeds with Chemical Spray	Aug.—114
Reducing Water Pollution by Ships and Boats	Aug.—149
Guidelines for Municipal Control of Family Pools	Oct.—176
Where Soil and Water Should Not Mix	Nov.—109
King-Sized Marina in a Federal-County Project	Dec.—104

## GENERAL AND MISCELLANEOUS

A New Look at the Substance Water	Jan.—79
Model Traffic Interchange	Mar.—174
Photography Aids Municipal Functions	Apr.—114
City Safety Program	Jun.—204
Pays Many Dividends	Aug.—100
Aerial Application of Fertilizer	Aug.—101
Portable Generators Add Versatility to Truck Fleet	Aug.—101
Fighting Lake Weeds with Chemical Spray	Aug.—114
Efficient Sheet Piling Techniques	Aug.—119
Speed Marina Bulkheading	Aug.—119
Corrosion of Steel Piles in Salt Water	Sep.—86
How Cities Use Odor Control Chemicals	Sep.—134
Architect's Dream Makes Contractor's Nightmares	Sep.—204
Reconnaissance of the Frontiers of Public Works Research	Oct.—88
Where Soil and Water Should Not Mix	Nov.—109
Cutting Operating Costs Through a Systematic Maintenance Plan	Nov.—131
In Tacoma, Pedestrians Ride	Nov.—141

## AIRPORTS

Ground Fault Locator Protects Airport Lights	Jan.—97
Small Air Terminal Blends Economy with Eye Appeal	Jan.—139
Airport Vicinity Land Use Studies —An Urgent Need	Nov.—116

## DAMS & FLOOD CONTROL

Surface Drainage Problems Caused by Urban Development	Jan.—118
Storm Water Detention in Urban Areas	Jan.—146
Unusual Storms Tax Drainage Facilities	Jul.—89
Driftwood: A Drainage Maintenance Problem	Aug.—105
Drainage Reservoirs Solve Flood Problem	Sep.—119
Flooding Reduced by Lowering a Dam	Dec.—78
